

**DELIVERY SYSTEM FOR A STENTLESS VALVE BIOPROSTHESIS**

**ABSTRACT OF THE DISCLOSURE**

The current invention discloses a catheter and a method for delivering a stentless  
bioprosthesis in a body channel, the method comprising percutaneously introducing a catheter  
5 into the body channel, wherein the catheter contains said stentless bioprosthesis at a retracted  
state; and disengaging said stentless bioprosthesis out of a distal opening of the catheter by a  
pulling mechanism associated with the catheter structure.
